High Performance Beta Nucleation Masterbatch Systems from Mayzo for Geogrid

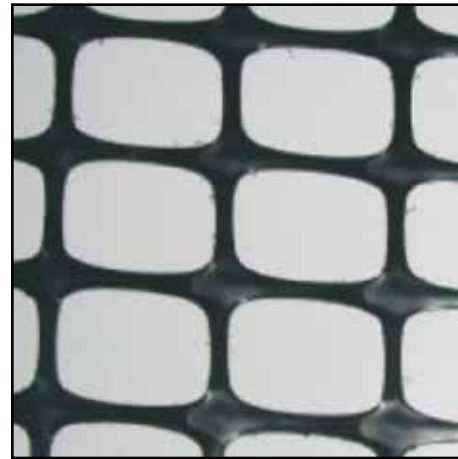

- MPM 1110
- MPM 2000

- More uniform drawing (smaller node regions and wider, thicker strands)
- Higher tensile strength
- Higher torsional rigidity
- Significant raw material savings due to down-weighting potential (up to 25% lighter weight)
- Higher line speeds (productivity improvement) – up to 50% increase in through-put rates observed
